

Country Calling Code and Flag Extension for Magento CE 2.1.x or Later

User Guide

Guide for Country Calling Code and Flag Extension for Magento 2

This is a new feature added to the module named **PHPCuong_CountryCallingCode**, this extension helps to display the country calling code and flag beside the telephone number on the customer's shipping address and billing address.

Why should you use the Country Calling Code and Flag Extension for Magento 2?

As we know by default Magento 2 requires the customer to type a telephone number for each customer's shipping address and billing address. Your store sells the products to customers in multiple countries, each country will have a private calling code. When the administrator checks each order, they want to contact the customer by the telephone number. If they don't have the calling code of that country, they can not call the customer. Grasp this need, we created a new extension called **PHPCuong_CountryCallingCode** helps to manage and display the calling code beside the telephone number of a customer's shipping address and billing address.

So where will the country calling code be displayed?

1. On the Front-end

- The country calling code and flag will be displayed beside the phone number of the shipping address and billing address on the checkout page.
